

MATERIAL DATA SHEET

05-208

05-208 is a PTFE-based material with a selection of fillers that assists in increasing performance in lubricated or non-lubricated dry gas applications. It is a good cost-effective solution for a wide range of non-lubricated applications.

| Properties | Value | Units | Method |
|-------------------------|-----------|---------|-------------------|
| Tensile Strength | 16.0 | MPa | BS EN ISO 13000-2 |
| Elongation | 100 | % | BS EN ISO 13000-2 |
| Hardness | 68-73 | Shore D | BS EN ISO 13000-2 |
| Specific Gravity | 2.10-2.14 | | BS EN ISO 13000-2 |
